Value-Based Insurance Design:
Using “Smarter” Cost-sharing to Align Consumer Incentives with Alternative Payment Models

Shifting the Discussion from “How much” to “How well”

Overview

• Impact of Consumer Cost-sharing
• New Approach: “Clinically Nuanced” Cost-sharing
• Value-Based Insurance Design
• Putting Innovation into Action
• Identifying and Removing Waste
• Synergies with Alternative Payment Models
Getting to Health Care Value
Shifting the discussion from “How much” to “How well”

- Innovations to prevent and treat disease have led to impressive reductions in morbidity and mortality.
- Regardless of these advances, cost growth is the principle focus of health care reform discussions.
- Despite unequivocal evidence of clinical benefit, substantial underutilization of high-value services persists across the entire spectrum of clinical care.
- Attention should turn from how much to how well we spend our health care dollars.
For today’s discussion, the focus is on costs paid by the consumer, not the employer or third party administrator.

Archaic “one-size-fits-all” cost-sharing fails to acknowledge the differences in clinical value among medical interventions.

Consumer cost-sharing is rising rapidly.
Deductibles on the rise
Percentage of covered workers with an annual deductible of $1,000 or more for single coverage

- Small firms
- All firms
- Large firms

Source: Kaiser Family Foundation and Health Research and Educational Trust
“I can’t believe you had to spend a million dollars to show that if you make people pay more for something, they will buy less of it.”

Barbara Fendrick (my mother)
Impact of Increases in Consumer Cost-Sharing on Health Care Utilization

A growing body of evidence concludes that increases in consumer cost-sharing leads to a reduction in the use of essential services, worsens health disparities, and in some cases leads to greater overall costs.

Americans Reporting Problems Paying Medical Bills in Past Year

- Uninsured: 53%
- Income <$50,000: 47%
- Adults 18-64: 29%
- HDHP: 26%
- All private insurance: 23%

Source: Kaiser Family Foundation/New York Times Medical Bills Survey
• While important, the provision of accurate price and quality data does not address appropriateness of care nor substantially impact consumer behavior.

• Additional solutions are necessary to better allocate health expenditures on the clinical benefit – not only the price or profitability – of services.
Understanding CLINICAL NUANCE
A Solution to "One-Size-Fits-All" Cost-Sharing
Clinical Services Differ in the Benefit Produced

- Office Visits
- Diagnostic Tests
- Prescription Drugs
Despite these differences in clinical value, consumer out-of-pocket costs are the same for every clinician visit within a network...
...for all diagnostic tests...

- Blood Sugar Monitoring
- CT Imaging for Back Pain
Consumer out-of-pocket costs are the same for all drugs within a formulary tier.
The Clinical Benefit Derived From a Service Depends On...

- Who receives it
- Who provides it
- Where it's provided
Clinical benefit depends on who receives it.

Screening for Colorectal Cancer

- First-degree relative of colon cancer sufferer: Exceptional Value
- Average risk 50 year old: High Value
- 30 year old with no family history of colon cancer: Low Value
who provides it...

High Performance

Certified

Poor Performance

Poor, Average, Excellent
Clinical benefit depends on where care is provided.

- **Ambulatory Care Center**
  - \$\

- **Hospital**
  - $$$
Implementing Clinical Nuance

Value-Based Insurance Design

Sets cost-sharing to encourage greater utilization of high-value services and providers and discourage use of low-value care.
Implementing Clinical Nuance: Value-Based Insurance Design

Sets cost-sharing to encourage greater utilization of high-value services and providers and discourage use of low-value care

- Successfully implemented by hundreds of public and private payers
V-BID Momentum Continues

Pharmacy Plan: 26% Planned for 2015, 15% In place in 2014
Networks: 13% Planned for 2015, 20% In place in 2014
Medical Plan: 9% Planned for 2015, 19% In place in 2014

- CBO
- SEIU
- MedPAC
- Brookings Institution
- The Commonwealth Fund
- NBCH
- PCPCC
- Families USA
- AHIP
- AARP

- National Governor’s Assoc.
- US Chamber of Commerce
- Bipartisan Policy Center
- Kaiser Family Foundation
- NBGH
- National Coalition on Health Care
- Urban Institute
- RWJF
- IOM
- PhRMA
Putting Innovation into Action: Translating Research into Policy

- Patient Protection and Affordable Care Act
- Medicare
- HSA-qualified HDHPs
- State Health Reform
ACA Sec 2713: Selected Preventive Services be Provided without Cost-Sharing

- Receiving an A or B rating from the United States Preventive Services Taskforce (USPSTF)
- Immunizations recommended by the Advisory Committee on Immunization Practices (ACIP)
- Preventive care and screenings supported by the Health Resources and Services Administration (HRSA)

Over 137 million Americans have received expanded coverage of preventive services
• Patient Protection and Affordable Care Act
• Medicare
• HSA-qualified HDHPs
• State Health Reform
Why not lower cost-sharing on high-value services?

The anti-discrimination clause of the Social Security Act does not allow clinically nuanced consumer cost-sharing.

"providers may not deny, limit, or condition the coverage or provision of benefits"
H.R.2570/S.1396: Bipartisan “Strengthening Medicare Advantage Through Innovation and Transparency”

- Directs HHS to establish a V-BID demonstration for MA beneficiaries with chronic conditions
- Passed US House with strong bipartisan support in June 2015
CMS Announces Medicare Advantage Value-Based Insurance Design Model Test

A 5-year demonstration program will test the utility of structuring consumer cost-sharing and other health plan design elements to encourage patients to use high-value clinical services and providers.

*Red denotes states included in V-BID model test*
Putting Innovation into Action: Translating Research into Policy

- Patient Protection and Affordable Care Act
- Medicare
- HSA-qualified HDHPs
- State Health Reform
HSA-HDHP enrollment and out-of-pocket expenses continue to grow

Maximum Out-of-pocket expense 2006 to 2014

- Individual: $5,000 to $6,350
- Family: $10,000 to $12,700

IRS Safe Harbor Guidance allows zero consumer cost-sharing for specific preventive services

Including:

- periodic health evaluations/screenings
- routine prenatal and well-child care
- child and adult immunizations
- tobacco cessation programs
- obesity weight-loss programs

However, IRS guidance requires that services used to treat "existing illness, injury or conditions" are not covered until the minimum deductible is met.

As HSA-HDHP enrollees with existing conditions are required to pay out-of-pocket for necessary services, they utilize less care, potentially resulting in poorer health outcomes and higher costs.
Potential Solution: High Value Health Plan

Flexibility to expand IRS "Safe Harbor" to allow coverage of additional evidence-based services prior to meeting the plan deductible.
Putting Innovation into Action: Translating Research into Policy

- Patient Protection and Affordable Care Act
- Medicare
- HSA-qualified HDHPs
- State Health Reform
• State Exchanges – Encourage V-BID (CA, MD)
• Medicaid – Michigan
• State Innovation Models – NY, PA, CT, VA
• State Employee Benefit Plans
Value-Based Insurance Design
Growing Role in State Employee Plans
Implementing V-BID for State Employees: Connecticut State Employees Health Benefit Plan

- Employees receive a reprieve from higher premiums and receive lower cost-sharing if they commit to:
  - Age-appropriate screenings/preventive care
  - Participate in disease management programs for chronic conditions
- Compliance required to remain in plan
- 2 year results:
  - Increased use of preventive services
  - Improved medication adherence
  - Decreased ER visits
  - Inconclusive cost impact
## Combining ‘Carrots’ and ‘Sticks’ to Enhance the Financial Impact of V-BID Programs: Identify Waste

Aligning Payer and Consumer Incentives: As Easy as Peanut Butter and Jelly

Many “supply side” initiatives are restructuring provider incentives to move from volume to value:

- Medical Homes
- Accountable Care
- Bundled Payments
- Reference Pricing
- Global Budgets
- High Performing Networks
- Health Information Technology
Unfortunately, some “demand-side” initiatives – including consumer cost sharing and a lack of incentives to stay within an ACO - discourage consumers from pursuing the “Triple Aim”
Impact of Aligning Physicians and Patients: Financial Incentives to Lower Cholesterol

The alignment of clinically nuanced, provider-facing and consumer engagement initiatives is a necessary and critical step to improve quality of care, enhance patient experience, and contain cost growth
