

## Clinical Implications of Braidwood Ruling Necessitating the Use of Pre-ACA USPSTF Recommendations

**Table 1. If Ruling Upheld, Current A/B Services that Would No Longer Require Coverage without Cost-Sharing (n=15)**

a. Services receiving only A/B recommendation <i>after</i> March 2010 (n=5)	b. Services graded (not A/B) before 2010, but upgraded to A/B after 2010 (n=10)	
Screening for anxiety in children and adolescents	Aspirin use to prevent preeclampsia and related morbidity and mortality	Screening for lung cancer
Interventions for falls prevention in community-dwelling older adults	Screening for gestational diabetes+	Screening for unhealthy drug use
Behavioral counseling interventions for healthy weight and weight gain in pregnancy	Screening for Hepatitis B Virus infection in adolescents and adults	Primary care interventions for tobacco use in children and adolescents
Preventive interventions for perinatal depression	Screening for Hepatitis C Virus in adolescents and adults	Behavioral counseling for skin cancer prevention
Pre-exposure Prophylaxis for prevention of HIV infection*	Screening for intimate partner violence, elder abuse, and abuse of vulnerable adults+	Screening for Human Immunodeficiency Virus infection (for those not at increased risk)+

**Table 2. If Ruling Upheld, Current A/B Services that Would Require Coverage without Cost-Sharing Using pre-2010 Recommendations (n=31)**

a. Services receiving an A/B recommendation before 2010 and remained A/B <u>with no significant updates</u> after 2010 (n=14)		
Screening for abdominal aortic aneurysm	Screening for breast cancer+	Screening for depression in adults*
Screening for preeclampsia	Screening for Rh(D) incompatibility	Behavioral counseling for STIs+
Screening for Hepatitis B Virus in pregnant women	Screening for obesity in children and adolescents	Ocular prophylaxis for gonococcal ophthalmia neonatorum
Screening for syphilis infection in nonpregnant adolescents and adults	Screening for syphilis infection in pregnant women	Folic acid for the prevention of neural tube defects*
Behavioral interventions for weight loss to prevent obesity-related morbidity and mortality in adults	Screening and behavioral counseling interventions for unhealthy alcohol use in adolescents and adults	
b. Services receiving an A/B recommendation before 2010 and remained A/B <u>with significant updates</u> after 2010 (n=17)		
b1. Services with significant change in the population to receive recommended services (n=9)		
Screening for cervical cancer+	Primary care interventions for breastfeeding	Screening for colorectal cancer
Screening for depression and suicide risk in children and adolescents	Screening for prediabetes and type 2 diabetes	Screening for vision in children ages 6 months to 5 years
Risk assessment, genetic counseling, and genetic testing for BRCA-related cancer	Screening for chlamydia and gonorrhea (change for gonorrhea recommendation)	Screening for osteoporosis to prevent fractures
b2. Services with significant change in process or treatment modality recommended (n=7)		
Screening for asymptomatic bacteriuria in adults	Screening for latent tuberculosis infection*	Screening for hypertension in adults
Screening and interventions for prevention of dental caries in children younger than 5 years	Statin use for the primary prevention of cardiovascular disease in adults	Interventions for tobacco smoking cessation in adults, including pregnant persons
Behavioral counseling interventions for healthy diet and physical activity for cardiovascular disease prevention in adults with cardiovascular risk factors		
b3. Services with significant change in population to receive recommended services and treatment modality (n=1)		
Medication use to reduce risk for breast cancer		

**Table 3. If Ruling Upheld, Services receiving a “DRAFT” A/B Rating that Would Not Require Coverage without Cost-Sharing (n=6)**

a. New Draft recommendations with draft A/B Grade (n=2)	b. Updated recommendations with draft A/B Grade (n=4)	
Screening for anxiety in adults+	Screening for depression and suicide risk in adults	Folic acid supplementation to prevent neural tube defects
Screening for hypertensive disorders of pregnancy	Screening for latent tuberculosis infection in adults	Pre-exposure Prophylaxis for prevention of HIV infection
