But Still Perished
Innovations to prevent and treat disease have led to impressive reductions in morbidity and mortality.

Irrespective of remarkable clinical advances, cutting health care spending is the main focus of reform discussions.

Underutilization of high-value care persists across the entire spectrum of clinical care leading to poor health outcomes.

Health Care Costs Are a Top Issue For Purchasers and Policymakers: Solutions must protect consumers, reward providers and preserve innovation.
The Tension Between Cost Containment and the Underutilization of Effective Health Services

Bernard S. Bloom (a1) and A. Mark Fendrick (a2)
• Innovations to prevent and treat disease have led to impressive reductions in morbidity and mortality

• Irrespective of remarkable clinical advances, cutting health care spending is the main focus of reform discussions

• Underutilization of high-value care persists across the entire spectrum of clinical care leading to poor health outcomes

• Our ability to deliver high-quality health care lags behind the rapid pace of scientific innovation
Flintstones Delivery
Moving from the Stone Age to the Space Age: Change the health care cost discussion from “How much” to “How well”

- Everyone (almost) agrees there is enough money in the US health care system; we just spend it on the wrong services and in the wrong places.

- Moving from a volume-driven to value-based system requires a change in both how we pay for care and how we engage consumers to seek care.

- The most common patient-facing strategy - consumer cost-sharing – is a ‘blunt’ instrument, in that patients pay more out of pocket for ALL care regardless of clinical value.
Health Plan Deductibles have grown more than ten times faster than inflation over the last decade.
Americans Do Not Care About Health Care Costs; They Care About **What It Costs Them**

**Patient Worry About Out-of-Pocket Healthcare Costs at All-Time High**

A report from the Commonwealth Fund noted that patients are not confident they can afford high out-of-pocket healthcare costs.
I can’t believe you had to spend a million dollars to show that if you make people pay more for something, they will buy less of it.

- Barbara Fendrick (my mother)
Cost-sharing worsens disparities and adversely affect health, particularly among economically vulnerable individuals and those with chronic conditions.

A “smarter” cost-sharing approach that encourages consumers to use more high value services and providers, but discourages the use of low value ones.

• Sets consumer cost-sharing on clinical benefit – not price
• Little or no out-of-pocket cost for high-value care; higher cost-sharing for low-value care
• Implemented by hundreds of public and private payers
• Bipartisan political support
• Enhances equity

Putting Innovation into Action: Translating Research into Policy
ACA Sec 2713: Selected Preventive Services be Provided without Cost-Sharing

• Receiving an A or B rating from the United States Preventive Services Taskforce (USPSTF)

• Immunizations recommended by the Advisory Committee on Immunization Practices (ACIP)

• Preventive care and screenings supported by the Health Resources and Services Administration (HRSA)
COVID-19 Testing and Vaccines Provided without Cost-sharing
Access to Preventive Services without Cost-Sharing: Evidence from the Affordable Care Act

- Over 230 million Americans have enhanced access to preventive services
  - 150 million with private insurance – including 58 M women and 37 M children
  - 61 million Medicare beneficiaries
  - Approximately 20 million Medicaid adult expansion enrollees
- A majority of studies showed increases in use of fully covered services
- Studies that included socioeconomic status reported more substantial increases in utilization of preventive services in financially vulnerable patients, suggesting that the policy reduced disparities in the delivery of preventive care
Texas Judge Finds ACA Requirement for Preventive Services Without Cost Sharing Invalid

• Several outstanding questions remain, but it is possible that this ruling will mean that employers will no longer have to provide first-dollar coverage for the 52 services that have received an “A” or “B” rating from the U.S. Preventive Services Task Force.

• This requirement benefitted almost 152 million people in 2020 and led to increases in cancer screening and vaccinations, improved access to contraceptives, and earlier detection and treatment of chronic health conditions, including hypertension, depression, high cholesterol and diabetes.
A Texas Judge Just Invalidated The Preventive Services Mandate. What Happens Next?

Nicholas Bagley, A. Mark Fendrick

MARCH 30, 2023
Percentage of Employers That Would Impose Cost Sharing for Preventive Services if Allowed by Law

2 in 5 individuals report that they will not use preventive services if they are no longer fully covered.
CANCER SCREENING
New VBID Center research shows that out-of-pocket costs are common and non-trivial for necessary follow-up testing after initial, abnormal no-cost cancer screening test.

- Breast
- Cervical
- Colorectal
- Lung

Average out-of-pocket costs for tests after a free cancer screening test:

1. Colonoscopy after positive stool test result: $100
2. Imaging & biopsy after suspicious mammogram: $152
3. Biopsy after suspicious Pap smear or cervical exam: $155
4. Follow-up tests after lung cancer screening CT scan: $424

FAQS ABOUT AFFORDABLE CARE ACT IMPLEMENTATION PART 51, FAMILIES FIRST CORONAVIRUS RESPONSE ACT AND CORONAVIRUS AID, RELIEF, AND ECONOMIC SECURITY ACT IMPLEMENTATION

January 10, 2022

Q7: Are plans and issuers required to cover, without the imposition of any cost sharing, a follow-up colonoscopy conducted after a positive non-invasive stool-based screening test or direct visualization test (e.g., sigmoidoscopy, CT colonography)?

Yes. A plan or issuer must cover and may not impose cost sharing with respect to a colonoscopy conducted after a positive non-invasive stool-based screening test or direct visualization screening test for colorectal cancer for individuals described in the USPSTF recommendation. As stated in the May 18, 2021 USPSTF recommendation, the follow-up colonoscopy is an integral part of the preventive screening without which the screening would not be complete. The follow-up colonoscopy after a positive non-invasive stool-based screening test or direct visualization screening test is therefore required to be covered without cost sharing in accordance with the requirements of PHS Act section 2713 and its implementing regulations.
CMS proposes follow-up colonoscopy after at-home test be considered preventive service

Riz Hatton - Friday, July 8th, 2022

Colorectal Cancer Screening

For CY 2023, we are proposing two updates to expand our Medicare coverage policies for colorectal cancer screening in order to align with recent United States Preventive Services Task Force and professional society recommendations. First, we are proposing to expand Medicare coverage for certain colorectal cancer screening tests by reducing the minimum age payment limitation to 45 years. Second, we are proposing to expand the regulatory definition of colorectal cancer screening tests to include a follow-on screening colonoscopy after a Medicare covered non-invasive stool-based colorectal cancer screening test returns a positive result. Both of these proposals reflect our desire to expand access to quality care and to improve health outcomes for patients through prevention and early detection services, as well as through effective treatments.

Inflation Reduction Act of 2022 Includes Several V-BID Elements

- Caps Medicare patients’ out-of-pocket costs at $2,000 per year, with the option to break that amount into affordable monthly payments
- Covers adult vaccines recommended by the Advisory Committee on Immunization Practices under Medicare Part D without cost-sharing
- Amends the Internal Revenue Code to create a safe-harbor allowing Health Savings Account-eligible plans to cover insulin prior to meeting the plan deductible
- Caps Medicare patients’ out-of-pocket costs for insulin at $35 per month
Inflation Reduction Act Research Series—
Medicare Part D Enrollee Out-Of-Pocket Spending:
Recent Trends and Projected Impacts of the
Inflation Reduction Act

The Inflation Reduction Act’s redesign of Medicare Part D will reduce enrollee out-of-pocket spending by about $7.4 billion annually among more than 18.7 million enrollees (36 percent of Part D enrollees) in 2025 – nearly $400 per person among enrollees who have savings in out-of-pocket costs under the IRA.

Employer Uptake of Pre-Deductible Coverage for Preventive Services in HSA-Eligible Health Plans

By Paul Fronstin, Ph.D., Employee Benefit Research Institute and A. Mark Fendrick, M.D., University of Michigan

ATA GLANCE

IRS Notice 2019-45 allows health savings account (HSA)-eligible health plans the flexibility to cover 14 medications and services used to prevent the exacerbation of chronic conditions prior to meeting the plan deductible.

In this Issue Brief, we report on the findings from a 2021 Employee Benefit Research Institute (EBRI) survey of employers that collected information on their response to the 2019 guidance. The survey examined not only whether employers added pre-deductible coverage as a result of Notice 2019-45, but also examined each of the allowed services individually; the type of cost sharing, if any, used in lieu of deductibles; and other relevant questions.
Percentage of Employers Who Expanded Pre-Deductible Coverage in HSA-Eligible Health Plan for Preventive Services Allowed Under IRS Rule 2019-45

- Expanded Coverage, 76%
- Did Not Expand Coverage, 18%
- Don't know if Coverage was Expanded, 6%
Additional Pre-Deductible Coverage that Employers Would Like to Add (Based on Open Ended Question)

- Not sure/would need to discuss: 26%
- More benefits/testing/preventive care/dr visits (general): 16%
- Mental health/substance abuse: 10%
- Heart-related care: 7%
- Anything we are allowed to add: 6%
- Additional care/testing for diabetics: 5%
- Emergency/ER/urgent care for catastrophic events/accidents: 5%
- Cancer-related care and/or screenings: 5%
- Drugs (general): 3%
- Asthma-related care: 3%
- COVID-related care: 3%
- It depends on what is permitted: 3%
- Vision care: 1%
- Vitamins/nutritional supplements: 1%
- Birth control/contraceptives: 1%
- Other (specific): 14%
- Other (non-responsive): 1%

81% of Employers Would Add Pre-Deductible Coverage for Additional Health Care Services If Allowed by Law
November 29, 2021

The Honorable Janet Yellen  
Secretary  
U.S. Department of the Treasury  
1500 Pennsylvania Avenue NW  
Washington, D.C. 20220

The Honorable Charles P. Rettig  
Commissioner  
Internal Revenue Service  
1111 Constitution Avenue NW  
Washington, D.C. 20224

Dear Secretary Yellen and Commissioner Rettig:

The Smarter Health Care Coalition (the Coalition) appreciated working with the Department and the Service as you considered and finalized Notice 2019-45, which allows more flexibility for health plans and employers to cover certain chronic disease prevention drugs and services pre-deductible in Health Savings Account-eligible plans. We remain grateful for the broadened preventive care safe harbor detailed in IRS Notice 2019-45, and we write to provide very encouraging data about the number of health plans and employers that have changed their plan benefit designs in response to the guidance. As a result of this overwhelming, positive response, we urge you to expand the list of items and services that may be covered under the preventive care safe harbor to include additional high-value, low-cost drugs and services used to prevent complications of other chronic conditions, especially those that would prevent exacerbation of mental and behavioral health conditions, helping millions of Americans improve their mental and physical health.
Chronic Disease Management Act of 2023: Expands Services and Drugs for Chronic Conditions Classified as Preventive Care

117TH CONGRESS
1ST SESSION

S. 1424

To amend the Internal Revenue Code of 1986 to permit high deductible health plans to provide chronic disease prevention services to plan enrollees prior to satisfying their plan deductible.

IN THE SENATE OF THE UNITED STATES
APRIL 28, 2021

Mr. THUNE (for himself and Mr. CARPER) introduced the following bill; which was read twice and referred to the Committee on Finance

A BILL

To amend the Internal Revenue Code of 1986 to permit high deductible health plans to provide chronic disease prevention services to plan enrollees prior to satisfying their plan deductible.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.
Paying for More Generous Coverage of High Value Care: Reduce Spending on Low Value Care
Paying for More Generous Coverage of High Value Care: Reduce Spending on Low Value Care

- Increase premiums – politically not feasible
- Raise deductibles and copayments – ‘tax on the sick’
- Reduce spending on low value care

Examples include:

- Vitamin D screening tests
- Diagnostic tests before low-risk surgery
- PSA screening for men 70 and older
- Branded drugs when identical generics are available
- Low-back pain imaging within 6 weeks of onset

$345 BILLION
In the United States, low-value healthcare disproportionately impacts communities of color.

Reducing Low-Value Care to Improve Health Equity

Reducing use of low-value care, starting with services that provide no clinical benefit in particular patient populations, is central to improving health equity.
Blacks And Hispanics More Likely To Receive Low-Value Care Than Whites

Health Affairs. https://doi.org/10.1377/hlthaff.2016.1416
The ACA grants HHS the authority to eliminate coverage for USPSTF ‘D’ Rated Services in Medicare.
Milliman Health Waste Calculator
Commonwealth of Virginia Unnecessary Care Initiative

• Among 5.5 million Virginia beneficiaries, 1 in 5 received at least 1 low-value service in 2014

• The 44 low-value services were delivered 1.7 million times, which cost $586 million (≈2% of healthcare spend – does NOT include care cascades)
ACA Sec 4105:
Selected No-Value Preventive Services Shall Not Be Paid For

SEC. 4105. EVIDENCE-BASED COVERAGE OF PREVENTIVE SERVICES IN MEDICARE.

(a) AUTHORITY TO MODIFY OR ELIMINATE COVERAGE OF CERTAIN PREVENTIVE SERVICES.—Section 1834 of the Social Security Act (42 U.S.C. 1395m) is amended by adding at the end the following new subsection:

“(n) AUTHORITY TO MODIFY OR ELIMINATE COVERAGE OF CERTAIN PREVENTIVE SERVICES.—Notwithstanding any other provision of this title, effective beginning on January 1, 2010, if the Secretary determines appropriate, the Secretary may—

“(1) modify—

“(A) the coverage of any preventive service described in subparagraph (A) of section 1861(ddd)(3) to the extent that such modification is consistent with the recommendations of the United States Preventive Services Task Force; and

“(B) the services included in the initial preventive physical examination described in subparagraph (B) of such section; and

“(2) provide that no payment shall be made under this title for a preventive service described in subparagraph (A) of such section that has not received a grade of A, B, C, or I by such Task Force.”.

(b) CONSTRUCTION.—Nothing in the amendment made by paragraph (1) shall be construed to affect the coverage of diagnostic or treatment services under title XVIII of the Social Security Act.

HHS granted authority to not pay for USPSTF ‘D’ Rated Services
Examples of USPSTF Grade D Services

- Prostate cancer screening ≥ 70 years
- Cervical cancer screening > 65 years
- Colon cancer screening > 85 years
- Cardiovascular screening in low risk patients
- Asymptomatic bacteriuria screening
- COPD screening
- Vitamin D to prevent falls among older women
Annual Use and Cost of Seven Grade D Services Among Medicare Enrollees

Total Annual Count: 31 million

Total Annual Costs: $478 million

Addressing Low Value Care (USPSTF Ratings)

OPM expects FEHB Carriers to cover all preventive services recommended by the United States Preventive Services Task Force (USPSTF) with an “A” or “B” rating as a preventive service. Those with a “D” rating indicate that the USPSTF recommends against the service because there is moderate or high certainty that the service has no net benefit or that the harms outweigh the benefits and should not be covered as a preventive service.

As coverage of preventive services rated a “D” rating needlessly drives up costs with no associated medical benefit, FEHB Carriers are reminded that the accurate processing of claims includes review to ensure that medical services are appropriate and necessary. Therefore, OPM is instructing FEHB Carriers not to cover as preventive benefits, those services with a sole rating of “D” from the USPSTF. A current list will be included in the technical guidance.

CMS promotes value-based insurance design in final payment notice for 2021

Much of CMS’s framework—including a list of high-value services that insurers could cover with little no impact on premiums but better care incentives—comes from the University of Michigan’s Center for Value-Based Insurance Design. The list includes a number of the same preventive care benefits that can be newly provided by a high-deductible health plan paired with a health savings account on a pre-deductible basis under Treasury guidance from July 2019. CMS also notes that PrEP, an HIV prevention medication, must soon be covered without cost-sharing by all non-grandfathered private health plans (including individual, small group, large group, and self-insured plans).
